### Nineteen Hundred and Ten Was Born With "Red Hair'

By Victor L. Berger.

T is not often that the working class and the common people of any city have so good a chance to strike at their oppres-sors as they will have in Milwankee in the coming election. They have a chance to strike at the trusts, at the local

monopolies, the street car company and the others, and vote for a change in the conditions under which nine persons out of ten are nowadays forced to live.

Truly, the voters of Milwankee, and especially the workingmen, owe it to their own intelligence, to their families and to the entire country to make the most of this opportunity.

For years we used to hear that old chestnut that workingmen threw away their votes when they voted for their own party, because they could not elect anybody—that therefore they ought to vote for a Republican or a Democrat.

This condition has been entirely changed by the Social-Democratic party in Milwaukee. Not only is it now generally conceded that the ocial-Democratic party has a better chance than either of the two capitalistic parties going it alone, but the following is the situation:

The Republican party is so completely split and demoralized that up to date it cannot even find a candidate willing to be slaughtered.

The Stalwarts and the corporation Republicans will continue in their trade with the Democrats. Besides, the Democrats have the advantage of the ownership of illiterate workingmen's votes. On the other hand, the idea is general that the Republican party is the organization of the big exploiters—an opinion which is confirmed by what La Follette and his following say about their own party.

As for the Democratic party, it has been for a generation or so the organization of the small grafter, the boodler, the contractor, the red light district man and the criminal. The rule of Dave Rose in Milwaukee has only been paralleled by the rule of Tammany in New

If there has been less outery against graft and stealing in Milwan-kee during the last few years—if the shady work of old party politi-cians and contractors has been less brazen—this has been due only to the presence of the few Social-Democrats in the various councils, who acted as watchdogs for the people.

It is the Social-Democratic party in Milwaukee which has succeeded in raising a city election above the low plane of little meaningless promises and personalities.

Both the old parties know that there is no difference between them. Both the old parties fear the light thrown upon them. Both

the old parties fear our logic, our facts, our honesty.

That is why the capitalist parties want to combine in nine wards, as we are informed by the daily press, and were seriously considering a fusion on the city ticket.

For it is evident and denied by no one who knows our political

conditions that the trusts own both of the old parties.

That there is absolutely no difference between Aldrich the Republican leader in the Senate and the father-in-law of John D. Rockefeller, Jr., on one hand—and Bailey, the Democratic leader and the agent of the Standard Oil Company, on the other hand.

And that Neal Brown, the last candidate of the Democratic party of Wisconsin for the United States Senate, is one of the most active defenders in the country of the water power grabbers and the land and

That John I. Beggs, Dave Rose and Vincenz Schoenecker are Democrats. That every thievish contractor doing business with the city is fully as well satisfied with the Democratic city administration as with Republican rule.

The Republicans will not put up much of a campaign in spite of the wealth at their disposal. Their battle against the Democrats will not even rise to the dignity of sham battle.

Eventually they will find a candidate for mayor. They must do so in order to hold the so-called "Progressives" (the radical Half-breeds, or what is left of them) in line, and keep them from voting the Social-Democratic ticket. These "Progressives" would, of course, never vote for Schoenecker or any of the Rose gang-and the moment the Republicans should fail to put up a "banner bearer," they would turn "red" for mere shame.

furn "red" for mere shame.

So the machine will nominate some loud-mouthed phrase-monger for them—some superficial "grandstand player" who will be just the right kind of a man to "impress" the petty bourgeois corner-saloon reformer. And after the "Progressives" are thus taken care of, the "business men" will turn in as usual and try to elect the Democratic ticket "in order to defeat the Socialists."

John I. Beggs and the street railway company and all the other ervice o cenz Schoeneeker-who grew up in the school of Dave Rose, who was

Rose's tool for many years—as Dave Rose himself.

They fear nobody but the working class. They fear no party but the Social-Democratic party.

One of the greaf shortcomings of the past has been that for generations local politics have played a small part in our public life.

Working people especially have left municipal government to a small set of pothouse politicians who have turned it into a money

making business The working class in the past left higher politics to the capitalists

and capitalistic lawyers.

And the working class in the large cities left city government to the dive-keeper, the ward heeler and the professional politician.

That was the secret of the rise of Tweed and Croker in New York, Bobby Burke in Chicago, and Dave Rose in Milwaukee.

ow Milwaukee with its enlightened working class - enlightened by millions of pieces of literature, that have been spread during many years—is peculiarly fitted to be the place for the beginning of the new

era in the United States.

The voters of Milwankee have tried Social-Democratic aldermen,

Social-Democratic supervisors, Social-Democratic school directors-and not one of them has been found wanting.

Milwaukee, while one of the greatest manufacturing centers of Milwaukee, while one of the greatest mannacturing centers of the country, according to a late report of the United States Census Bureau, is the least congested of any large city of the United States, Milwaukee has less of the hopelessly degenerated human beings known as the slum proletariat. And Milwaukee has more enlightened and thinking workingmen than any other city in the United States,

This Milwaukee campaign, is therefore, of vital importance to the working class of America.

Some say that we could not bring about Socialism by carrying a

But it is also true that nowhere, not even in a national campaign, is there a greater necessity for intense Socialist agitation than in

The election of the Social-Democratic candidates will mean not

The election of the Social-Democratic candidates will mean not the mere cleaning out of the foul brood of grafters who make bargains with corrupting corporations. It will mean not only the retirement of boodling and "divying" contractors from our public life. It will mean the beginning of a new principle in home-government. It will mean that for the first time in the history of Milwaukee

Voters must remember that every vote cast for the Social-Democratic party is a knock at the present system of exploitation. They must remember that every vote for the Social-Democratic party is a vote against misery, crime, prostitution and woman and child labor.

They must remember that every vote for the Social-Democratic party is a vote for a decent standard of living, and a strike against the fearful rise of all the necessaries of life.

Workingmen will protest against the price of beef and pork and shoes and coats and rents and coal-by voting the Social-Democratic

Small business men will protest against the meat trust and the wool trust and the coal trust and the drug trust and the steel trust and the coffin trust—by voting the Social-Democratic lickel.

Workingmen and small business men, who want real improvements, and the best governed city they have ever had—and who want progress and a higher civilization and a new world for their children and children's children-who want to abolish this cut-throat capitalist system and establish a new social order of justice and general culture, will vote the Social-Democratic ticket.

And as for the organized Social-Democrats of Milwankee-the Socialists of the entire country look to them to make good. It is expected that they will do their full duty in this election. That they will spread more literature, agitati more and work harder than they have ever worked before. Victor 1. Berger

Fifty million hogs. Twenty-five million sheep and lambs.

According to these figures from the OFFICIAL GUIDE BOOK, circulated only among the cold storage men, there is in storage ONE ENTIRE ANIMAL FOR EACH ADULT IN THE UNITED STATES, with enough whole animals left over to give two to each family.

This meat is being held in 558 cold storage plants. In addition, it may interest the worried housekeepers to know that in seventy-eight fish freezing plants in the country there are fish waiting

to be doled out that are valued at \$25,000,000. In other cold storage plants during any year now, according to the storage men's own statis-the struggling wage-earners will find:

Fruits valued at \$50,000,000.

Then, besides there are millions of pounds of potatoes, onions, thousands of turtles, eels, cases of canned goods, and milk, butter and cheese valued at \$100,000,000.

The total value of meat and foodstuffs placed in cold storage during a year at present is, according to the figures of the storage concerns, close to three billion dollars

Danbury against 200 hatmakers of this state.

After having been out over two hours the jury ordered actual damages of \$74,000 to the plaintiff, but as the result was brought under the Sherman anti-trust law triple damages can be recovered.

There was a remarkable scene in court when the verdict was announced. The defendants in attendance were stunned for a time and then in groups dejectedly discussed the blow. It is estimated that the costs in the case will amount to at least \$10,000 and these with the councel less, may bring the bill against the United tiatters of North America to fully \$250, 000.

Socialism's proposal of governof the Future

"Is the Republican Party Breaking Up?" is the title of the leading feature in the February American Marican Harazine. Its author is Ray Stannard Baker, and he claims that there are no longer two parties except in name In reality there are three parties which he defines as follows:

"I. The 'Stand-patters' or Conservatives, represented by such men as Atdrich and Cannon, among the Republicans, and McEnery of Louistana, among the Democrats. They stand essentially for the control of government by proferty and priviteged interests. They have with them the considerable group of older and temperamentally conservative voters who still cling unthinkingly to party mames.

"2. The Insurgents, or Progressives, led by La Follette, Bristow, and the point emplastical that this does not mean common ownership and by no means equal ownership has nothing to do with personal property. It refers only to the production of all that we now share in common and need in common—railways, ships, mines, waterways and so on.

# V. L. BERGER SAYS:

Every Socialist should know something besides his Karl Marx. The mere knowledge of a few Socialist phrases is not sufficient to make a "scientific" Socialist.

In order to know why Socialism is coming, a Socialist should have some idea of the theory of evolution, and some knowledge of history; in order to know why it is coming; he must know something of economic development.

We, as Socialists, are vitally interested in the development of civilization. History for us is not a collection of "shallow village tales," the story of the coronations, weddings and burials of kings. For us the true lesson of history is the story of the progress of mankind by gradual steps from brutal savagery to enlightenment, culture and humanity.

The manner in which one system has grown out of another, feudalism out of slavery, and capitalism out of fendalism, is most suggestive of the manner by which the Socialist republic

will gradually develop out of the present system. To do this is the aim of a set of books recently published under the title of Library of Original Sources. It gives a history of the various lines of human development. And what is its special advantage, this history is given in the original documents that formed the milestones of the development.

"THE LIBRARY OF ORIGINAL SOURCES"

sweeps away the higotry and superstition that has accumulated around government, law, social science, religion, etc.—brings to light the naked truth and show why Socialism is coming. This rare collection of original documents cover as well the entire field of thought—science, philosophy, sociology, seducation, history, religion, etc.—presenting the ideas that have influenced civilization in the actual words of those who have developed them; a history—not of mere events—but of the evolution of human ideas and institutions. Ten large and handsome volumes, printed on deckle edge paper, bound in art vellum, gold tops and title. To produce this work over 125 American and European specialists spent years searching the archives and libraries of the world, gathering, classifying and translating the great original documents underlying the civilization of the past.

# The Common Good

An "Americanized" Adaptation of Robert Blatchford's Famous
"Merrie England"

(Continued from last week.)

This is gross tyramy and gross injustice, but it is only another example of the meanness, the selfishness, and the dishonesty of those whom we falsely call the refined and superior classes. It is aimising to hear that a man is "too much of a gentleman" to empty his own ashpit, when the truth is that he is not enough of a gentleman to refuse to allow his fellow-citizen to empty it for him. Under Socialism snobbery will perish. And when snobbery is dead, gentility will be ready for burial.

Another common question is: 3. Under Socialism: Would the frugal workman lose his house

and savings?

First, as to the savings. Mr. Richter, in his foolish pamphlet, "Pictures of the Future," which was used in vain to scare the workmen in Germany, makes the people revolt because a Socialistic government has nationalized their savings.

Now, we will assume that such a thing happened, and that the deposits in the banks were nationalized. Would the frugal workman lose by that? I say he would not.

It is true that at present the frugal workman only gets about one-half of his earnings. Under Socialism he would get all his earn-

But why does the frigal workman save? He saves against a 'rainy day." Because if he fall ill, or live to be old and infirm, he will have to go to the workhouse unless he has saved.

But under Socialism he need have no fear. No man would be left destitute or helpless in his old age. The sick would be cared for, the widows and orphans would be cherished and defended.

You know that many men now pay high premiums to insurance companies. This is to provide for their widows and children. Under Socialism the state would provide for the widows and children.

That is to say that Socialism is the finest scheme of life insurance ever yet devised.

Suppose you had by dint of great care succeeded in saving five or six hundred dollars. Would you not cheerfully pay that for a state promise of support for yourself when old—of ample and honorable support-and of support and education for your children after your

But I don't think it is at all likely that a Socialist state would take the worker's savings.

And again I ask you to turn your attention to the present system, under which every worker is robbed of two-thirds of all he earns.

Then as to the worker's cottage. Assuming that he has bought with his savings, and even assuming that the state nationalized it. What then? A workman now buys a house that he and his children may be sure of a home,

Under Socialism every man would be sure of a home.

One more consider our present system. A few men own their own houses. But the great bulk of the people cannot own a foot of When I was in Ireland I visited some "estates" upon the Galtee

Hilis. I saw farms which had been made by the "tenants." places where the peasants had gone up into the bleak hills, where the limestone blocks lay thick and only a thin layer of sandy turf covered the rock, and had spent twenty years in making the land. They re-moved the boulders, they dug soil in the valleys, and carried it up the steeps in baskets; they bought manne and line and they built their own havels out of mud and stones.

And then the estate and houses were the property of the landlord, and he taised their rents from 200 to 500 per cent.

And we are asked whether Socialism would rob the frugal worker of his home!

It is strange that men should attach importance to such trivial points as these; but yet I believe that these small errors are a great inindrance to the spread of Socialism.

Here is another droll question: 4. Under Socialism: Who would get the salmon, and who would

the smoked fish?

Let us follow the system I suggested and reverse the question. Who gets the salmon and who gets the smoked fish now?

Is it not true that the salmon and all other delicacies are monon-

olized by the idle, while the coarse food falls to the lot of the worker? Perhaps under Socialism the salmon might be eaten by those who

catch it. At present it is not. Or perhaps the dainties would be reserved for invalids and old people, or for delicate women, and children.

But certainly we should not see a lot of big, fat, strong aldermen

gorging turtle and champagne while frail girls worked sixteen hours a day on a diet of crusts and roffee.

It is quite possible that even under Socialism there might not be enough salmon and pineapple for all. But it is quite certain that there would be enough bread and beef and tea for all, which there certainly

## NEMPLOYMENT

A NEW BOOKLET ON

#### THE BIGGEST PROBLEM Written by SENATOR GAYLORD

Senator Gaylord introduced, at the last session of the Wisconsin tegislature, a resolution, in the form of a perition to congress, asking for immediate action to relieve the unemployment problem in this country.

Of course the country

Ing for inamediate action to releve the intemployment problem in this country.

Of course, the resolution was killed. The Republicans didn't want to know anything about it, for fear they might "recognize Socialism"—and the Democrats followed sun.

In scarching for data on the subject, so as to present the argument as fully as possible. Senator Gaylord found a surprising scarcity of material available on American conditions. He began to start inquiries in every direction, however, and replies began to start inquiries in every direction, however, and replies began to come in.

Meanwhile the Senatoe was invited to debate the subject of "Unemployment and Socialismas its Remedy" with John Basil Barnhill. Mr. Barnhill did not know much about unemployment, or Socialism, either, but the debate gave Comrade Gaylord occasion to probe deeper into the question.

Finding such a scarcity of information on the subject, and no Socialist book or pamphlet bearing directly upon it in detail, he decided to give the American comrades the immediate use of what material he had altrady secured—meanwhile continuing his investigations.

material he had already seemed meanwante continuing in gathers.

The forty pages of this pamphlet are packed with Information, gathered from state and national bureaus of laboe, foreign reports, and such facts as could be secured from American labor organizations.

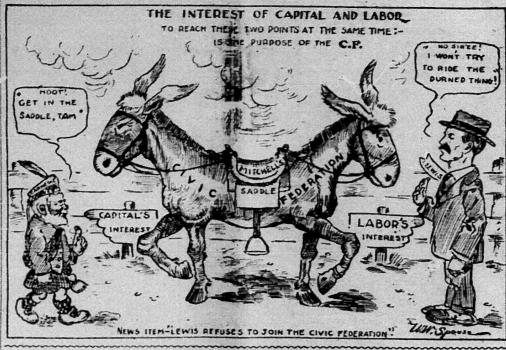

The pamphlet deals with Seasonal Unemployment, Industrial Displacement, The Chronic Unemployed. The Panie and The Industrial Reserve Army. The returns from Wiscousin are given with especial accuracy and completeness.

We have heard much of unemployment, and most of us know what it is to be "out of a job". But this little work sets forth the fact, and the Socialist argument based upon it, with startling clearness.

As soon as the men organized, and before any demands were made for increased wages or better conditions, the management of the rubber mill were informed of the fact. Some of the members were evidently SPIES of the management, with the result that notice was given to every employe of the mill to the effect that a shut-down would take place and that when reopened it would be strictly non nnion. All employes to get back would have

The Taft administration, to aid and protect the railroads in their postal grafts, is proposing to raise the price charged for carrying newspapers and magazines through the mails. The following letter written to Congressman Stafford on the subject, by Contrade Charles T. Stone, will be read with interest and profit:

Open Letter to Wm. H. Stafford M. M. Watcher, F.E. II. Honorable Wm. H. Stafford, Member of Congress, Washington, D. C. On April 4, 1907, the Minnesota it upon themselves to say in which legislature enacted a 2-cent fare occupations they may fix hours of law for railroads. Also it has a labor. Sometimes they have guessed one way and sometimes another. Mayhap, sometimes they have for all roads. And not so long ago that it has been forgotten there was the choicest sweets of the land for an exciting contest over the right breakfast, while at other times there of states to govern themselves. And has been no Lreakfast, owing to today each state is supposed to govern itself in state matters.

Now, this rate law, a state law, was to have been effective on May 1, 1907... But before that date a United

Stales judge had ENJOINED the Minnesota attorney general from enforcing the 2-cent fare charge.

This plan of declaring law un-constitutional by Injunction is surely a new and startling method of class rule. We are accustomed to the old plan of finding laws unconstitutional, but to find one United States judge setting at naught the will of the people of a whole state is "the limit." Who rules? A Religion of Love.

A Religion of Love.

A pamphlet has just left the press and is for sale, which the author helieves will cause quite a sensation. The author demands nothing less than the abolishing of all the thousand existing traditional churches and the introducing of one universal church built on the principles that are common to all the leading religions of the world: Confincianism, Hindooism, Judaism, Christianity and Mohammedanism. medanism.

He holds that the one standard or criterion of truth and life, the one principle of theology and ethics is love. The title of his pamuhlet is, "The Universal Religion of Love: the Religion that Blends All Religions into One."

MADE LAW IS AN ESTAB-LISHED FACT. And further, we shall say that such law, in the preponderance of cases, is CAPITALISTIC, because the judges have capitalistic inclinations, due to environment—and possible other inducements.

Guessing is a great thing in law. If there is no precedent there must be a new guess.

The feeling against the interur-ban car is not lack of progressive spirit. No one objects to interurban car lines connecting the city with the country villages and cities. That is in the interests of progress.

The city might as well come to it first as last. It should provide special trackways from the outskirts to the center of the city and hid them all enter. This would annoy on one, injure no residence street-it would solve the whole question.

"It is necessary to the happiness of man that he be mentally inithful to himself."

Mr. Charles T. Plunket, president of the National Association of Cotton Magnifacturers, says that the high price of American labor handicaps the cotton industry. In many Southern mills children receive from to to 25 cents a day. In some New England mills adult spinners are paid, on an accerage, 50 cents a day. It is quite evident that partiotic American cotton mill owners, laboring to promote their country's trade in feering parts, must be upheld. Monntain high tariffs are not enough.
